

## Metane sensors

### AE09/GM, AE09/GM-12 y AE09/GM-24

#### Description

This will detect the presence of metane.  
Consisting of: A power supply with encapsulate transformer, sensor, alarm and service LEDs, alarm buzzer, sensitivity adjustment and encapsulated relay with voltage-free output.

Installed inside an ABS box measuring 130 x 70 x 50.

AE09/GM: Consumo 5W

AE09/GM-12: Consumo máximo:230mA

Consumo en reposo: 178mA

Consumo en alarma: 228mA

AE09/GM-24: Consumo máximo:230mA

Consumo en reposo: 178mA

Consumo en alarma: 228mA
