

## CUSTOMIZATION PROGRAM AGE42

### Description

The AGE42 program has been designed by Aguilera Electrónica to facilitate the creation and maintenance of the customization files used for Algorithmic Centrals:

- AE/SA-PC.
- AE/SA-C1.
- AE/SA-C2.
- AE/SA-C8.
- AE/SA-C23H.
- AE/SA-C83H.
- AE/SA-TCR.

The AGE42 program allows:

- Create new customizations
- Edit existing customizations
- Import channel structures created through the Start-up program
- Capture the personalization of the connected exchanges
- Dump customization to connected exchanges
- Verify the integrity of personalization data
- List, by screen and printer, personalization data through various types of reports
