datasheet

Communication Interface
AE/SA-IDC

Description

The AE/SA-IDC module works as an interface between the AGUILERA ELECTRONICA AE2NET network and a control computer: EUROPA III control station, installation remote control system or integration with other companies control systems, MODBUSS.

It has an Arcnet RS-485 connection for connecting to the AE2NET network and two RS-232 and RS-485 serial ports for connection with the control system.
