datasheet

control panel of 4 zones in Metalic box
AE/C5-4M

Description

Metal panels with microprocessors certified as per EN 54 parts 2 and 4.
They include :
- Conventional detection loops: 2 or 4 according to model, with end of line live.
- Access level control by key .
- 2 manned evacuation exits .
- Fire Relay (general alarm)
- General accident relay .
- Auxiliary output of 24 V DC .
- Keyboard with 6 keys for operation .
- "Zone Test" mode
- Individual connection/disconnection of detection zones and evacuation zones
- 10 independent LEDs for indication of alarms.

They only need one 12V / 7Ah battery.
They carry out continuous monitoring of the entire system: state of the batteries, failure of the CPU, status of the loops, loop power supply, state of the power supply unit, siren supervision, earth fault, status of the siren loop.
