

WALL CABIN FOR WATER MIST AN/CM1

Description

Fire hydrant for Microaqua high pressure water mist systems by Aguilera Extinción. It consists of a wall cabinet that houses a lance for mist and an axial spool with automatic collection.

Mist water lance specially designed for the fight against fires manually from the very origin of the same.

The design of the lance provides effective fire fighting and protection for the user of the lance, creating a nebulizing curtain that protects him from the fire.

Valid for those applications where for technical or economic reasons it is not possible to carry out a fixed installation of diffusers.

Nebulized water lance

Advantage

- Quick response to an outbreak of fire, attacking it from its source.
- Low water consumption.
- Simple installation
- Water damage is minimized.

TECHNICAL CHARACTERISTICS:

Wall mounting cabinet available in two finishes:	Carbon steel 1.5 mm thick oven painted (RAL 3000) AISI-304 stainless steel
Dimensions (height-width-depth):	600 X 800 X240
Axial spool:	automatic take-up
Hose:	3/8 ". Length 25 m (consult for other lengths)
Nozzle:	It has 4 central and 8 lateral directional diffusers
Flow:	variable between 11/25 liters per minute depending on the model.
Test pressure:	330 bar
Working pressure:	140 bar
