

MODULAR CONTROL PANEL WITH 2 TO 6 ZONES FOR GAS DETECTION

AE/GI-CE100

Description

2-zone control unit for gas detection, expandable up to a maximum of 6 zones by means of the AE/GI-CE101 module. Modular DIN rail mounting system.

It has a display that indicates the real time measurement of the detectors, 3 alarm relays, 1 fault relay, programmable levels, password protected control menu.

AE/GI-CE101 - Expansion module for 2 zones

Module for the control of 2 4-20mA sensors. DIN rail mounting.

AE/GI-AL100 - 24Vdc power supply

24Vdc power supply for the CE100 system. 230Vac input.

AE/GI-AL101 - 13,8 Vdc power supply

13,8Vdc power supply for charging emergency batteries.

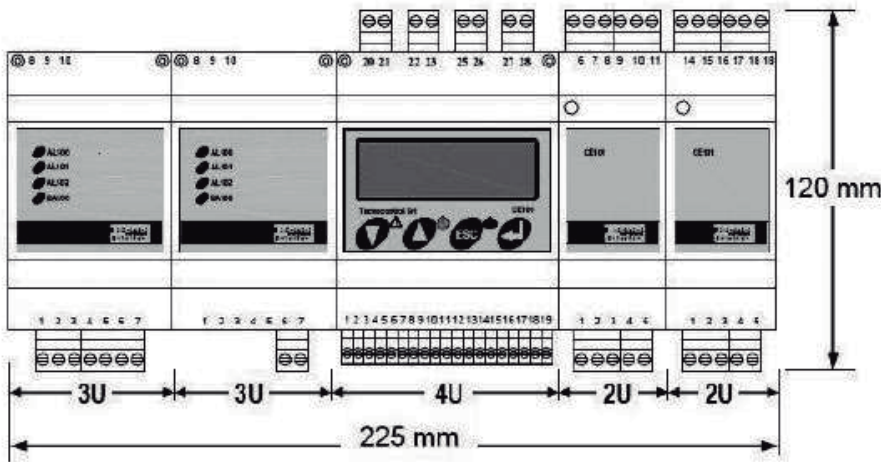

AE/GI-AL102 - Lithium battery power

Power supply for charging emergency lithium batteries.

AE/GI-BA100 - Emergency batteries

Lithium emergency battery.

Dimensions

TECHNICAL CHARACTERISTICS

Power supply:	12-24Vdc
Installation:	DIN Rail
Consumption:	4VA without connecting zones 8VA with 2 zones connected 12VA with 4 connected zones 15VA with 8 zones connected
Alarm level:	Programmable
Dimensions:	71x90x73 mm
