

# MICROPROCESSED CENTRAL UNIT OF 200 ZONES FOR GAS DETECTION

## AE/GI-CE700

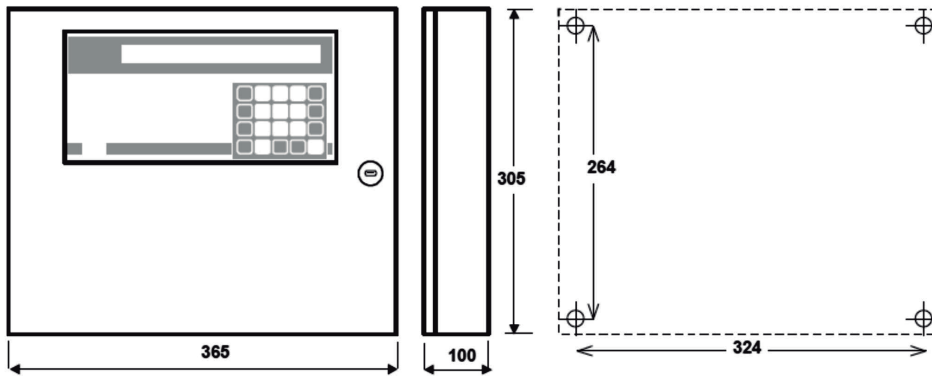

### Description

Surface mounted microprocessed control unit for the control of 200 gas detectors. The first 16 can be connected to the control panel if up to two AE/GI-ES096 expansion cards are added (8 inputs each), the rest are mounted on remote AE/GI-CE380UR units through an RS-485 bus.

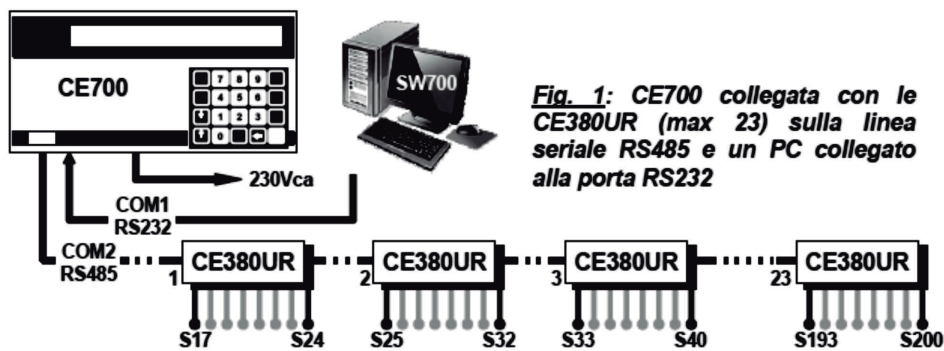

The maximum number of remote units is 23. Each remote unit can control up to 8 detectors.

### Dimensions

### Connection

**Fig. 1:** CE700 collegata con le CE380UR (max 23) sulla linea seriale RS485 e un PC collegato alla porta RS232

### TECHNICAL CHARACTERISTICS

Power supply:	230Vdc
Output:	200 relays
Protection:	IP40
Installation:	AE/GI-CE700: Surface
AE / GI-CE700R:	19 "rack
Alarm level:	3 Programmable
Capacity:	1 12V / 7Ah battery
