

## 8 OUTPUT RELAY MODULE AE/C5-R8

### Description

8 relay module, up to 1000 m away.

It has individually selectable NO or NC voltage free contacts by means of a jumper.

The characteristics of the relay are:

- 1 A, at 30 Vdc
- 0.5 A, at 110 Vac

Valid for connection to conventional C5 series control panels, models:

AE / C5-8P and AE / C5-8-16.

The relays are activated individually in case of zone alarm.

The module needs external 24 Vdc power.

The connection is 4 or 6 wires (if powered from the control panel).
