

TEST UNIT FOR FLAME DETECTORS

AE/FL-T

Description

Test unit designed to generate a wide range of optical output signals.
Flame Sensors can be tested and activated for flame control and fire detection applications

TECHNICAL CHARACTERISTICS

| | |
|---|---|
| Broad visual output spectrum: | UV, Visible, Near IR, Mid-IR. |
| Testing of many types of Flame Sensors: | UV, UV / IR, UV / IR ² , IR ³ , IR ² , IR. |
| Portable, with rechargeable NiCd battery and charger. | |
| Optical selection of the type of output: | Constant lighting. |
| Regular Flash Sources (Frequency Range). | |
| Irregular Flicker Sources (similar to flames). | |
| Optical Output Intensity: | Selectable, with LED bar graph indication. |
| General range: | Greater than 3 meters. |
| Timing: | 30 Seconds for each test. |
| Auxiliary Power: | 24Vdc for tests. |
